ALTURA PLATINUM

ACCESS

Experience luxury with the Altura Platinum, a versatile lift for a wide range of applications.

The Altura Platinum is driven by proven and reliable hydraulic technology. Available in a wide range of sizes and configurations, the Altura Platinum is a highly adaptable lift that can be used in a wide range of public and private environments, indoors and outdoors. It is available with its own metallic shaft or can be installed in a masonry shaft.

An Altura Platinum lift can be anything from a simple platform with a console wall and false ceiling to a fully enclosed cabin with sliding doors. Choose from a wide range of door options, wall finishings, ceilings and floors to create the perfect lift for your home or business.

02

**EXPERIENCE LUXURY
WITH THE ALTURA
PLATINUM.**

“

When we designed our new theatre, the Altura Platinum was the perfect choice for ensuring that our visitors who use wheelchairs can get from the lobby up to the auditorium in comfort and style.”

03

Altura lifts are fully compliant with all relevant European safety standards and are suitable for use in private or public buildings.

1 SMOOTH FROM START TO FINISH

All Altura Platinum lifts are fitted with a soft start and stop device as standard, guaranteeing you an exceptionally smooth ride from the moment you press the floor button on the control panel. For your safety, cabins with open sides are fitted with a hold-to-run control button that must be kept permanently pressed during the ride, whilst the fully enclosed cabin has one-touch controls.

2 DESIGN YOUR LIFT

Choose from the wide selection of Altura cabin finishes to create a lift that suits your needs and matches your surroundings. The minimalist Simplicity range offers discreet coordination with its environment and is a good choice with public buildings, whilst the elegance of the Deluxe range will suit any stylish interior.

3 EASY TO INSTALL

The Altura Platinum is designed to be installed in just a few days, and when installed in its own shaft, requires minimal construction work. It is offered with eight standard plan sizes or can be custom-made to your required dimensions.

The lift runs on standard mains electricity. Altura lifts are fully compliant with all applicable safety standards.

ALTURA PLATINUM
CAN BE CUSTOMISED

CHOICE OF COLOURS
AND FINISHES.

FEATURES

COMFORT FOR ALL

1

Control Panel

The sleek backlit Altura control panel is available in a choice of finishes and has a crystal clear digital display for the floor indicators.

Floor indicator displays for the landings are available as an option. The display panels give information about the status of the lift, and they show diagnostic codes for easy service and maintenance.

2

Designed to Fit

The Altura Platinum is suitable for installation in public buildings and can be configured to meet the most stringent requirements for accessibility. The self-contained system is simple to install and can be fitted into small spaces in new or existing buildings. Multiple doors per floor are possible and all lifts have a handrail and braille buttons as standard.

For security in public buildings, the lift can be secured with a selection of locking options.

3

Your Safety and Comfort

All Altura Platinum lifts are fitted with a soft start and stop device, guaranteeing you an exceptionally smooth ride every time. The edges of open-sided cabins are fitted with photocells that will immediately stop the lift if any obstruction extends beyond the edge of the platform, keeping passengers safe at all times.

The lift is protected by a back-up battery power supply. A battery guard continuously monitors the charge level to ensure that there is always enough power in the batteries to run the lift in case of a power-cut.

CABIN OPTIONS

A LIFT FOR EVERY SITUATION

Altura Platinum lifts are available in a range of cabin configurations. Choose from open sided cabins with one, two or three walls or a fully enclosed cabin.

Cabins with open sides are fitted with hold-to-run controls whereas fully enclosed cabins have one-touch controls like a traditional elevator.

DOORS

The Altura Platinum has the option of fully automatic sliding doors on the cabin and landings, giving all the comfort and convenience of a traditional elevator.

Open cabins

The landing accesses are fitted with swing doors.

Enclosed cabins

The fully enclosed cabin is offered with two different door configurations:

- + Automatic sliding doors on cabin and landings.
- + Automatic folding doors on the cabin and swing doors on the landings.

All doors can be painted in a choice of colour, and are available with optional glass panels. See the Altura catalogue for full details.

THE ALTURA

ABOUT ACCESS

26

Access BDD is a division of thyssenkrupp Access Ltd. We give people around the world the ability to move comfortably around buildings by providing stairlifts, platform lifts and home lifts, which we distribute via a network of carefully chosen business partners. When you choose an Access BDD lift, you're choosing a high-quality product, supported by expert service and advice.

Our partners are all specialists in mobility or elevator products, and they receive extensive technical and commercial training on our products. Your Access BDD partner will guide you through the product options to help you choose a lift that meets your own needs and suits your surroundings. You'll also receive expert advice to ensure that your new lift conforms to relevant accessibility and safety regulations.

Our products are designed for easy installation and maintenance, with everything taken care of by your Access BDD approved partner.
